- **POC:** Gordon Osborn
- **Telephone:** 604-607-8877 **Email:** gordon@kdsolutionsgroup.com
- **Web Site:** www.kdsolutionsgroup.com
- **Product/Technology Title:** M113 Enhancements
- **Description of Product/Technology:**

The capability exists to upgrade existing M113 APC vehicles with modern drive and control systems. This upgrade is a full re-powering effort including the driver control station, thereby ensuring a safer and far more comfortable drive experience.

The upgrade ensures a quieter ride as well as an option to fully remote control a vehicle from >2 mile distance. Using the latest transmission technology IVT coupled with easy use and operation, this vehicle is a genuine “go anywhere and do anything” with its top speeds of 50 mph and unique hydrostatic braking.

Potential Applications:

- Low Ground Pressure Fire Fighting Vehicles for Forestry Departments.
- Rescue Departments needing hi-mobility and off road capable vehicles for urban rescue during storm/flood or earthquake emergencies.
- Security forces needing mobile and armor protective vehicles for extreme conditions.
- Off Road capable ambulance and rescue vehicles for any emergency.
- Recovery vehicles for soft ground use applications in areas where 4x4 drives are unable to access.

Cost/ea * : Power Pack and Driver Control Station - **\$ on request** / Softrack® Track System - **\$ 30,000.00**

Availability: on request

Other: Upgraded M113 FOV are being transferred to first responders, such as law enforcement agencies and emergency agencies, where they are finding new life. Agencies across the spectrum, from corrections to rescue teams, and across the nation, from Florida to Ohio to California, are discovering the benefits of these vehicles.
